RAISED FOR CANCER RESEARCH & RELATED PROGRAMS

WELCOME

WELCOME OUR V WINE CELEBRATION COMMUNITY,

Today is an incredible inflection point for the V Foundation. 2023 marks our 30th anniversary for the organization. What better time to reflect on the incredible IMPACT we have had as a community on the advancement of cancer research. Together, we have awarded over \$310 Million in research grants which have been used to fund all cancer types at the 71 NCI-designated cancer centers in the U.S. Thanks to your support, we have been able to help accelerate the pace toward achieving Jim's dream of Victory Over Cancer®. Throughout the weekend you will see the many ways the V Foundation has had profound IMPACT.

We will also look to our future IMPACT as we are significantly increasing our investment in research. Our V Scholar grants budgets have tripled. Our translational grants have new extended timelines and increased budgets. We have created a new All-Star grant which will award \$1 Million to continue to invest in past grant recipients who have proven earlier successes in their projects funded by the V.

2023 is also our very own 25th anniversary of the Wine Celebration. Julie Maples' vision of bringing the V Foundation for Cancer Research to Napa Valley has evolved into one of the top two charitable wine auctions in the country. This event has raised just shy of \$140 Million for the V Foundation. We boast the most prominent vintners in Napa Valley, incredible partners that help us underwrite this beautiful weekend, three days of inspiring world class events, a community of some of the most generous and philanthropic donors, and an all-star team of staff and volunteers who make it all possible. 2023 marks the 17th year that Coach K will grace our stage with his inspirational messages, and the 19th

year that Beth Nickel, our most gracious and generous hostess, opens the doors to this stunningly beautiful setting at Nickel and Nickel. It is a combination of inspiration, creativity, generosity, teamwork and pure magic that is the Wine Celebration.

We will continue to raise the bar on the IMPACT we have until we achieve Victory Over Cancer®, and as we always like to say, "We are going to have a heck of a lot fun while we are doing it!" So, in our 25th year, donned in our black-tie attire, inspired by the past IMPACT made by the V Foundation and educated on the significant IMPACT we have yet to do, let's bid high and bid often. As the single largest night of fundraising for the V Foundation for Cancer Research, let's make it an unforgettable night to remember with millions raised, so we can feel proud of what we've accomplished, smile about the memories and then get back to work until the job is done!

IMPACT GIVING

THERAPEUTIC RESISTANCE

WHAT DOES THIS MEAN?

First the good news: cancer patients have more treatment options now than ever, and in many cases, treatments produce remarkable results. Metastatic melanoma in adults and acute lymphoblastic leukemia in children are examples of once largely fatal cancers that are now survivable by many patients. The more sobering news for many cancer patients is that many therapies work for some time, but then they stop working. Researchers call this phenomenon resistance to therapy, or drug resistance, and it is one of the most challenging issues facing the cancer community: our patients, researchers, and clinicians.

WHAT IS THERAPEUTIC RESISTANCE?

Resistance happens when the cancer is initially treated successfully, and later the cancer has found a way around the treatment regimen. When the cancer cells resist the effects of treatment, they grow, either in the original site, or a distant location, causing disease recurrence or relapse. Sometimes resistance develops quickly, within a matter of weeks of starting treatment. In other cases, it develops months, or even years later, with the changes the tumor cells undergo allowing cancer cells to 'resist' what was initially a successful treatment strategy.

WHY DOES THE V FOUNDATION FUND THERAPEUTIC RESISTANCE?

Researchers can use genetic profiling to identify the BEST treatments for each patient, those least likely to develop therapeutic resistance. Cancer cells often 'kick out' cancer drugs and develop new mutations resist treatment. To overcome resistance, researchers can use targeted therapies against these changes to 'target' the proteins involved in cancer cell growth and spread. The immune system is a powerful tool against resistance, but the tumor microenvironment often suppresses the anti-tumor response. Goals of this research are to enable the immune system, with the addition of one therapeutic strategy, to manipulate the tumor microenvironment and prevent tumor escape and therapy resistance. Finally, computer scientists can make predictions about which patients will benefit most from which therapies. But this will take sustained funding to make meaningful progress and reduce cancer recurrence. This year we will highlight the tremendous impact and gains made by V Foundation Grantees in overcoming therapeutic resistance AND simultaneously emphasize the significant need for continued research.

2023 VINTNER GRANT HONOREES

Over the past 24 years, the V Foundation Wine Celebration has acknowledged the efforts and support of a participating vintner by awarding a Vintner Grant in their honor. For its special 25th Anniversary, the V Foundation is celebrating all previous grant honorees to acknowledge their collective efforts in the fight against cancer. Through these Vintner Grants, each honoree designated an area of focus with a cancer research grant in their name. The V Foundation is fortunate to have an accomplished Scientific Advisory Committee whose members are leaders in the cancer research field and are responsible for evaluating and selecting the most promising research projects to receive funding.

WE ARE SO HAPPY TO BE ACKNOWLEDGING THESE
PAST VINTNER GRANT AWARDEES. BECAUSE OF THEIR
DEDICATION, COMMITMENT, AND SUPPORT, WE HAVE BEEN

Resistance happens when the cancer is initially treated successfully, and later the cancer has found a way around the treatment regimen. When the cancer cells resist the effects of treatment, they grow, either in the original site, or a distant location, causing disease recurrence or relapse. Sometimes resistance develops quickly, but in other cases, it develops months, or even years later, with the changes the tumor cells undergo allowing cancer cells to 'resist' what was initially a successful treatment strategy.

To overcome resistance, researchers can use targeted therapies against these changes. Goals of this research are to enable the immune system, with the addition of one therapeutic strategy, to manipulate the tumor microenvironment and prevent tumor escape and therapy resistance. But this will take sustained funding to make meaningful progress and reduce cancer recurrence.

PRICKLY PATH QUILT BY DR. SUSAN HILSENBECK

Message from the Artist:

"Making this quilt has been its own prickly path— I started it in a class, ran out of fabric, had to improvise, had a crisis of confidence on the quilting, which I got over with help from a friend, and finally finished it last year. I learned a lot along the way.

We all have had difficult experiences with challenging paths. A diagnosis of cancer is certainly one of the most prickly and challenging. Hopefully, even with cancer, there are bright moments of sunny happiness and friends and family to help smooth the way, wherever it leads."

PRIDE MOUNTAIN VINEYARDS CELEBRATING OVER 30 YEARS

2021 ROCK ARCH TRIANGLE CABERNET SAUVIGNON

Pride Mountain Vineyards is uniquely situated high atop the Mayacamas Mountains with its estate vineyards divided by the Napa / Sonoma County line. Owned and managed by the Pride family since 1990, the historic Summit Ranch was first planted to grapes in 1869 and later, as Pride Mountain Vineyards, was included as only one of 22 California wineries in his book, "The World's Greatest Wine Estates" by Robert Parker, Jr.

Rock Arch, the winery's oldest cabernet sauvignon vineyard, provides the foundation of PMV's highly coveted and two-time 100-point Reserve Cabernet Sauvignon each year. In 2021, a micro-pick of about 170 pounds of grapes was hand-picked from the triangular section at the top of this vineyard and vinified, barrel-aged and bottled exclusively for the 2023 V Foundation Wine Celebration. Dark, rich, and mysterious, the 2021 Rock Arch Triangle Cabernet Sauvignon is mountain-grown Cab at its finest.

LIMERICK LANE

2017 ROCKY KNOLL ZINFANDEL

The Rocky Knoll is a 2.5 acre block on the north east corner of the estate. This is the steepest, rockiest driest part of the property and in addition, it is the only block where the Zinfandel is field-blended with Petite Sirah, Mourvedre, Carignane and Syrah.

These factors individually lead towards bolder flavors. Collectively, they produce the most masculine, powerful, intense wine from the Estate. This wine is consistently the most structured Zinfandel of the vintage.

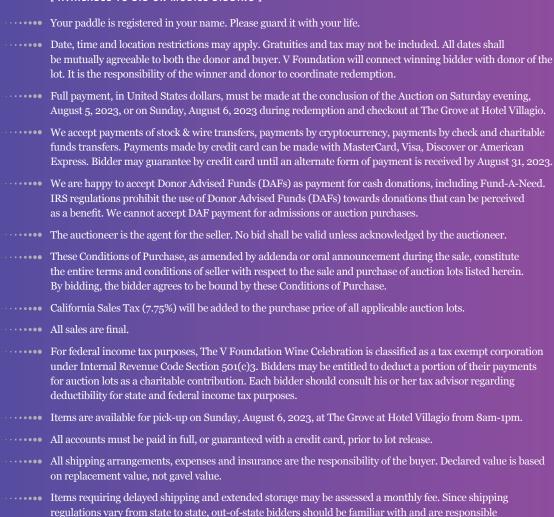

Not for the faint of heart, this wine begs for the heartiest of foods and occasions. 129 cases produced.

The V Foundation Wine Celebration is honored to announce the selection of dedicated volunteer Paul Dugoni as our 2023 Volunteer Grant Honoree. Paul has supported the V Foundation for 10 years, starting as an office intern as his first job out of college and returning each year to assist the V Foundation team as an Ops Manager.

Paul and his father, Russ Dugoni, created a local community Tennis Fundraiser, Ace Cancer, cumulatively raising over \$30,000 in support of the V Foundation. Ace Cancer was established in memory of Paul's mother, Lynn, who passed away from Small Cell lung cancer in 2005. The Dugoni family continues to volunteer each year in memory of Lynn, as well as Paul's maternal grandmother, Carolyn Sharpe, Paul's mother-in-law Kathy Pagliero, and Paul's best friend's mother, Carrie Foley, all of whom lost their battle with Breast Cancer.

Paul would like to thank his family and friends who have joined him in the fight against cancer by volunteering their time, energy, and effort to support The V Foundation Wine Celebration. Through all our collective efforts, we are truly making progress in achieving Victory Over Cancer.
